Thermal Protect POWERED by Richtech

G O I N G B E Y O N D T H E S C A N

The effects of health safety have many thinking of a seamless approach for transitioning back to the workplace. How do we protect the masses when reintegrating back into a "new normal"? How can we keep everyone informed, engaged, and protected by circulating automated real-time, rapid-response alerts? Organizations have been making technology decisions across their divisions without considering how it can all be connected to deliver a core set of communication, collaboration, and safety specific services.

**HAVRION Thermal Protect offers a versatile, in-depth, and non-intrusive way to enhance safety and promote wellness in public spaces. We're going beyond the scan and beyond the typical use of digital displays to enable rapid response alerts that protect life.**

## How can HAVRION Thermal Protect keep everyone safer?

Bringing together Richtech thermal scanning technology and HAVRION'S unique platform, we can identify and check every person's temperature before they walk into an enclosed space or building and rapidly provide instructions & messaging to them so they can move safely and confidently throughout your facility or school.

WE CONNECT TECHNOLOGIES.  
WE STREAM COMMUNICATION.  
WE PROTECT LIFE.

Integrating thermal ID scanner readings with floor plans, maps, and other data helps us understand various statistics that we can use to keep everyone in a building or public space as safe as possible.

### WITH HAVRION THERMAL PROTECT POWERED BY RICHTECH YOU CAN:

-  Keep track of how many people enter and exit a building.
-  Read everyone's body temperature to make sure no one has a fever.
-  Provide discrete, detailed instructions to every person after the thermal ID read so they understand where and how to move around the space.
-  Limit access to the building if necessary.
-  Integrate other 3rd party sensors and data to provide additionally safety layers such as environmental safety, gun safety, fire safety, and weather safety.
-  Accommodate and adjust to new processes policies, and situations to maintain a healthy workplace.
-  Physically adjust thermal ID scanner to accommodate people of all sizes.
-  Lock and unlock access with BLACK/WHITE ID listing with badges.

**MEDICAL GRADE / LV-D**  
Thermal Sensor
